

FROM DGM QUALITY CONTROL DESK

Mr. Nagaraj Narayan Naik

I feel honored and would like to thank the Management of our esteemed organization “Green Valliey Industries Limited – MAX Cement” for giving me an opportunity to work in this company.

It is at ease to address the group through “NISHTHA”. Max Cement produces the best quality cement which not only competes the local brand but also challenges the national brand in quality war. Quality today has become the foundation for constant management innovation and leadership. Attaining quality leadership requires that upper managers personally take charge of the quality initiative.

Quality pros have many names for these seven basic tools of quality, first emphasized by Kaoru Ishikawa, a professor of engineering at Tokyo University and the father of “quality circles.” Enlisted below are 7 indispensable quality tools that everyone should learn and apply in his work areana.

1. **Cause-and-effect diagram** (also called Ishikawa or fishbone chart): Identifies many possible causes for an effect or problem and sorts ideas into useful categories.
2. **Check sheet:** A structured, prepared form for collecting and analyzing data; a generic tool that can be adapted for a wide variety of purposes.
3. **Control charts:** Graphs used to study how a process changes over time.
4. **Histogram:** The most commonly used graph for showing frequency distributions, or how often each different value in a set of data occurs.
5. **Pareto chart:** Shows on a bar graph which factors are more significant.
6. **Scatter diagram:** Graphs pairs of numerical data, one variable on each axis, to look for a relationship.
7. **Stratification:** A technique that separates data gathered from a variety of sources so that patterns can be seen (some lists replace “stratification” with “flowchart” or “run chart”).

From The Editor’s Desk

Dear Readers,
“Change is life”. The environment around us is dynamic and so we are. With a lot of economic and social changes happening in and around us, its time now to assess ourselves on our whole year achievements and performances.

This issue of Nishtha briefs us about 7-QC tools, Max events at plant and marketing , motivational self improvement tips, few unknown facts of our country and quick learn words of wise advises.

Merry Christmas !

Stay Safe , Stay Healthy.

*Regards,
Nitesh Chaharia*

MR.WISE

“Among the four aspects of who you are – your body, mind, emotion and energy – people generally know emotion as the strongest force within them...”

-Sadhguru

MAX PANORAMA

MAX AUTOSPRINT CHALLENGE:-MAX Cement organized CAR RACING in association with East Jaintia Hills Adventure Motor Sports Association to promote sports and spread awareness for safety while driving.

Car racing competition was categorized in three levels viz below 1300 CC, 1300 to 1500CC and SUV. Max cement congratulates ever promising driver Mr. Amarpreet Singh who stood winner in all the three categories.

LEARNING PROGRAMME ON BUSINESS ETIQUETTE : Learning programme on “Business Etiquette” was conducted by Mr. Vikash Mishra on 30th November. A total of 30 employees attended the programme and benefited from it. The programme helped the employees understand the importance of business etiquette and the code of conduct that they should follow in their personal as well as professional life. The importance of self-Image and its importance were also explained to the trainees. Various corporate etiquette demonstration like (introduction; hand shaking; telephone; e-mail; dining; starting, conducting and ending a meeting exercises) were conducted in order to make the trainees better understand the concept. The overall aim of the programme was focused on personality development and image building

TECHNICAL TRAINING ON BASICS OF HYDRAULIC SYSTEM AND FUNCTION: A training programme was conducted by Mr. Vikas Verma, AGM – Automobile, on Hydraulic system and type of hydraulic pump for operators and mechanics of the department. It will help them in troubleshooting any malfunction related to hydraulic system.

The training topics were properly conveyed through word and action for the better understanding of the employees.

MAX PANORAMA

Customers win Big under Max Cement Dhan Varsha Scheme

Guwahati, November 17, 2016: Dhan Varsha Scheme, a consumer connect initiative by one of the Leading Cement Brands of North-East India, Max Cement, has been going on across the region from 1st August and will continue till 30th November 2016. The campaign has been able to create a buzz among the customers. Every Max Cement bag contains a gift coupon through which customers can win prizes like Car, Scooty, Refrigerator, Washing Machine, LED TV, Ceiling Fan, Electric Iron and Cash.

To avail the prizes customers need to produce the coupon to the shop from where they purchased it and collect the gift. The coupon redemption of the scheme has continuously been going on and many winners till dates have received different gifts and awards. Among the winners Mr. Nur Hussain, a resident of Bidyapur, Bongaigaon received LED TV while Mr. Vanlalmaiwa Varte and Mr. Lalpiengsang of Churachandpur, Manipur received Silver Bar and Ceiling Fan respectively. In Meghalaya, Mr. B. Jana from Umsning received Ceiling Fan, Mr. Klostiar Nonglum from Lumshong received Led TV, Mr. T. R. Kurbah from Latikor received Ceiling Fan, and Mr. Nicholad Mawrie from Latikor received Electric Iron.

মেস্স চিমেণ্টৰ 'ধন বৰষা স্কীম'

Kurbah from Latikor received Ceiling Fan, and Mr. Nicholad Mawrie from Latikor received Electric Iron.

PEARLS OF WISDOM

THE THREE TYPES OF PEOPLE

Vikash Mishra , Asst. Manager (HR & IR)

A teacher shows three toys to a student and asks the student to find out the differences. All the three toys are seemed to be identical in their shape, size, and material. After keen observation, the student observes holes in the toys. 1st toy it has holes in the ears. The 2nd toy has holes in ear and mouth. The 3rd toy has only one hole in one ear.

Then with the help of the needle, student puts the needle in the ear hole of the 1st toy. The needle comes out from the other ear. In the 2nd toy, when the needle was put in the ear the needle came out of a mouth. And in the 3rd toy, when the needle was put in, the needle did not come out.

The First toy represents those people around you who gives an impression that they are listening to you, all your things and care for you. But they just pretend to do so. After listening, as the needle comes out from the next ear, the things you said to them by counting on them are gone. So be careful while you are speaking with this type of people around you, who does not care for you.

The Second toy represents those people who listen to you all your things and gives an impression that they care for you. But as in the toy, the needle comes out from a mouth. These people will use your things and the words you tell them against you by telling it to others and bringing out the confidential issues for their own purpose.

The Third toy, the needle does not come out from it. These kinds of people will keep the trust you have in them. They are the ones who you can count on.

Moral: Always stay in a company of a people who are loyal and trustworthy. People, who listen to what you tell them, are not always the ones you can count on when you need them the most.

THE FOUR SMART STUDENTS

Rupesh Mishra , Asst. Manager (Commercial)

One night four college students were out partying late night and didn't study for the test which was scheduled for the next day. In the morning, they thought of a plan. They made themselves look dirty with grease and dirt. Then they went to the Dean and said they had gone out to a wedding last night

and on their way back the tire of their car burst and they had to push the car all the way back. So they were in no condition to take the test.

The Dean thought for a minute and said they can have the re-test after 3 days. They thanked him and said they will be ready by that time. On the third day, they appeared before the Dean. The Dean said that as this was a Special Condition Test, all four were required to sit in separate classrooms for the test. They all agreed as they had prepared well in the last 3 days.

The Test consisted of only 2 questions with the total of 100 Points.

1)Your Name _____ (1 Points)

2) Which tire burst? _____ (99 Points)

Options – (a) Front Left (b) Front Right (c) Back Left (d) Back Right

Moral: Be Responsible else you too will learn your lesson!

10 SELF IMPROVEMENT TIPS

Pawan Singh, Sr. Manager Mechanical

- Cultivate an attitude of learning:** The holy grail of self-improvement, this attitude ensures that you are open to the idea of learning without the false barriers of age, remain in tune with the changing times and do not get fossilized under the false assumption that learning is not for you, owing to a list of unique constraints
- Appreciate the difference between important and urgent tasks :** The two are synchronous and often used interchangeably, but are vastly different when it comes down to viewing life with a slightly long-term perspective.
- Master the art of changing habits :** Usually the most important thing that distinguishes the successful/unsuccessful or the dreamers/doers is the set of habits they follow. We overestimate the influence of willpower, it being a very finite resource. Instead, it makes far more sense to establish rituals and systems to get some serious work done.
- Exercise :** A good exercise regime lifts your mood, releases happy chemicals and keeps you prepared for the daily challenges in life. Our bodies are habitual to physical labor due to many millennia of conditioning/evolution while living as nomads or hunter gatherers. Sadly, the importance of health is often recognized only *after* some damage is done.
- Jump out of the comfort zone :** The openness of a person to new experiences is a likely indicator of the future growth trajectory, and a few studies have shown that slightly higher stress levels associated with a little discomfort result in an optimal anxiety that is best for our performance. If it is way out-of-the comfort zone, it leads to anxiety and breakdown. Always in the comfort-zone, you have been a proverbial frog in the well.
- Be comfortable with change :** An excerpt from Nassim Nicholas Taleb's book Antifragile sums it up beautifully- *"Some things benefit from shocks; they thrive and grow when exposed to volatility, randomness, disorder, and stressors and love adventure, risk, and uncertainty. Antifragility is beyond resilience or robustness. The resilient resists shocks and stays the same; the antifragile gets better"*. In a world which is changing so fast, it pays to grow better with change.
- Let the ideas mingle :** Discovering passion is over-rated. It's not a sweet fruit which drops down from the mighty skies if you try hard enough/wait patiently/are lucky enough or any of that shite. An average individual has a variety of interest areas which can potentially give rise to some really fresh innovations, if only you let the ideas in your mind mingle and play with each other.
- Be a finisher :** The world is replete with starters, but their creations seldom see the light of day just because they keep telling themselves bullshit reasons which stop them from shipping (procrastination is a better term for this). Once again, habits can come to the rescue as people who crawl their way out of boredom are the ones who get to start and finish things.
- Take risks :** Because life is too short to play safe all the time. Because betterment in the past can be attributed to the risks taken by our ancestors. Because you'll regret things you didn't do rather than what you did.
- Learn a strategy game :** It will open up your mind regarding the importance of timing, difference between battles and war; will let you enjoy the rush of having a strategic advantage and make you realize the importance of having a bird's eye view of the whole picture.

12 Interesting Facts about India

Mr. Nagaraj Narayan Naik , DGM(Quality Control)

1. The name 'India' is derived from the River Indus, the valleys around which were the home of the early settlers. The Aryan worshippers referred to the river Indus as the Sindhu.
2. The **number system** was invented by India. Aryabhatta was the scientist who invented the digit zero.
3. The **first six Mogul Emperor's** of India ruled in an unbroken succession from father to son for two hundred years, from 1526 to 1707.
4. The **World's First Granite Temple** is the Brihadeswara temple at Tanjavur in Tamil Nadu. The shikhara is made from a single ' 80-tonne ' piece of granite. Also, this magnificent temple was built in just five years, (between 1004 AD and 1009 AD) during the reign of Rajaraja Chola.
5. The **game of snakes & ladders** was created by the 13th century poet saint Gyandev. It was originally called 'Mokshapat.' The ladders in the game represented virtues and the snakes indicated vices. The game was played with cowrie shells and dices. Later through time, the game underwent several modifications but the meaning is the same i.e good deeds take us to heaven and evil to a cycle of re-births.
6. The **largest employer in the world** is the Indian railway system, employing over a million people !.
7. The **World's first university** was established in Takshila in 700 BC. More than 10,500 students from all over the world studied more than 60 subjects. The University of Nalanda built in the 4th century was one of the greatest achievements of ancient India in the field of education.
8. The **art of Navigation & Navigating** was born in the river Sindh 6000 over years ago. The very word 'Navigation' is derived from the Sanskrit word NAVGATI. The word navy is also derived from the Sanskrit word 'Nou'.
9. Bhaskaracharya rightly calculated the **time taken by the earth to orbit the sun** hundreds of years before the astronomer Smart. His calculations was - Time taken by earth to orbit the sun: (5th century) 365.258756484 days.
10. The **value of "pi"** was first calculated by the Indian Mathematician Budhayana, and he explained the concept of what is known as the Pythagorean Theorem. He discovered this in the 6th century, which was long before the European mathematicians.
11. The Baily Bridge is the **highest bridge in the world**. It is located in the Ladakh valley between the Dras and Suru rivers in the Himalayan mountains. It was built by the Indian Army in August 1982.
12. Sushruta is regarded as the **father of surgery**. Over 2600 years ago Sushruta & his team conducted complicated surgeries like cataract, artificial limbs, cesareans, fractures, urinary stones and also plastic surgery and brain surgeries.

विकास

अवधेश कुमार' अवध,'
सिविल अभियंता

विकास का ख्वाब
तेर रहा है आँखों में
कभी गाँधी बनकर
या जवाहर के रूप में

लोहिया व जे पी बनकर
या कि बनकर मनमोहन...
सजते रहे सपने
ठगते रहे जन साधारण को
अर्थशास्त्र के सारे नियम
नहीं भर सके गरीब का पेट
बुझा न सके गरीब की
प्यास...।

अब्राहम से अम्बेदकर तक
का लोकतन्त्र
या कि मार्क्स का समाजवाद
लोहिया व जे .पी का
शंखनाद

फेल ही तो हो गया
गरीब का तन ढँकने में ।

सपने बालू की भीत हो गये
पल में बर्नना और पल में
बिखर जाना...
आँखें भी तो पथरा गईं
सपने बुनने और उजड़ने में
अब मोदी भी आ गये
लेकर ख्वाबों का जखीरा
भ्रष्टाचार व कालाधन का
कोयले के बीच लुभाता हीरा
पुनः आँखों में पलने लगे
मनमोहक सपने
इस आस में कि शायद हो

जायें पूरे.....।
